Subject: RE: Thank you to all PLUS: MSI & KPI teams

I want to take this opportunity to thank each of you for the terrific job you have done and have been doing on PLUS project.

I appreciate your hard work and devotion which helped us building good relations with PLUS program team. The contributions of each team member are crucial for our success.

Thanks,

Neha Banthia, CSM

Subject: Thank you to all PLUS: MSI & KPI teams

Hello All,

Please join me in congratulating PLUS: MIS & KPI business and BIDM teams for their great teamwork and responsiveness in:

Bringing data to the NFG_MART:

As a part of the Phase 1 Chrome, Rescore and Appian LOA and DRA went live in the NFG_MART and enhancements were made to Appro, Synergy, ALS and RADAM early this year.

As a part of Phase 2 BIDM teams are working diligently on bringing in RPM (Commercial relationship data) and Appian DCS, VIA, WOA and CMS into the NFG_MART.

Also Phase 3 is currently being mapped which would bring even more sources including Lease Master, CACS, Noble Dialer and Appian LMS along with external data.

Developing reports and dashboards:

Collections and Production KPIs dashboards went live early this year.

Dealer 360 has been 80% complete awaiting additional sources to be brought in.

Also other dashboards such as Risk and Dealer Performance are on their way.

Special thanks to all BIDM teams involved to make this possible:

BSA: Soujanya Garikipati, Debi Mishra, Maruti Maurya

Architecture: Sangeet Kumar

Data Modelling: Sudhakar Mallampati, Madhavi Venigalla

ETL: Naveena Natarajan, Bikash Sing, Sudhir Nikam

QA: Anjana Rajagopalan

BI: Suman Busireddy, Madhav Srighakolapu, Wahid Islam

Project Management: Aldo Castillo

What does this all mean in terms of PFD business:

All this work will not only provide the necessary data infrastructure for Indirect Auto but also for most of our products including Indirect/Direct RV and Marine.

It will also enable all PFD teams with a 360 view into the business data enabling dashboards like Dealer 360 which was previously not possible and would lead way to more advanced analytics.

Another benefit would be to streamline KPIs and reporting to clean up the mismatching data across various teams.

Thanks to everyone else who has been involved and will continue to be involved,

Necati Arin Keskin
