Subject: BackOffice Team - Job Well Done

Team,

I wanted to take a second and congratulate the team on a very smooth and quiet go-live!

Since February there has been a ton of work put into this project to make it successful. From the first deliverable "Sprint 1 for ERP" through "SIT" , "UAT" and finally "Go-Live".

I am very pleased with the quality of work from this team and so far (1.5 weeks after cutover) we are looking very good in terms of data quality.

We are not out of the woods yet, since we are still fresh from go-live and may find some problems in the system in the next few weeks. However, I am confident that this team has done their due diligence and cleaned and mapped the data properly.

Next focus is on how we can clean the eParts data coming from Silicon Expert.

Thank you for all of your hard work,

Chris Pethan
